

HDMI Media Center

HDMI™ 1.3b

Video Scaling

Full HD 1080P

HDCP compatible

6 Inputs 1 Output
2x HDMI, 2x Analog, 2x VGA

Media centre of your home entertainment CS 20

The new transmedia Home Entertainment control unit CS 20 is a real novelty. HDMI sources as well as VGA or analogue video- / audio sources can be connected.

The CS 20 converts all signals into digital signals and scales 1080 p. Therefore, optimised digital signals at the HDMI exit now can be sent to the beamer or monitor with use of only one cable.

Prime image quality in Full HD.

- HDMI (v1.3b, Pixel Clock Rate HDMI input: 25 MHz ~ 225 MHz / HDMI output: 25 MHz ~ 165 MHz)
- Supports 1080P video scaling
- 3D Y/C separation Comb-filter
- 10 bits video processor for A/D conversion
- Supports IR remote control and manual control
- Converts analog audio and video signal to digital HDMI signal; switch among 6 sources, which including 2 HDMI, 2 analog (AV, S-Video, or YUV) and 2 VGA.
- DTS-HD, Dolby TrueHD lossless compressed digital audio compliant (HDMI input)
- Gold plated connectors
- Supports HDCP compliant devices
